Oktató	Research topic	Student tasks	Maximum student capacity	Slots filled
		Összesen	**66**	**39**
Vizin Gabriella	Moral emotions in clinical practice	join an ongoing research project	**2**	2
Berkics Mihály	The "Body Count", or attitudes towards the number of previous sexual partners in a mating context	Full research project, based on a previous questionnaire study	6	
Papp-Zipernovszky Orsolya	Health literacy and quality of life of oncology patients	data analysis	3	2
Kun Bernadette	Work addiction (FULL - no slots)	analysis	1	1
Magi Anna	Meta-analysis on criminal psychology	individual study	4	
Kekecs Zoltán	The relationship of hypnotizability and self-talk	Research planning and data collection	1	1
Kekecs Zoltán	Emergent psychological characteristics in large language models (LLMs)	Research planning and data collection	1	0
Márki Gabriella	Psychological changes after childbirth	Research planning, data collection, analysis	1	1
Koncz Patrik	Psychological functioning among addicts	Data analysis	2	2
Rigó Adrien - Vikár Míra	Investigating the psychological factors influencing the intention to have childr	New research - English language data collection is needed	2	0
Attila Keresztes	Instigating lifespan neurocognitive changes in memory in children and young and old adults, using high-resolution magnetic resonance imaging and behavioral methods	All phases of ongoing or planned research	2	2
Polner Bertalan	Dynamics of cognition, beliefs, and emotion in daily life	Secondary analysis of existing, open daily life timeseries datasets (studies from my group or other public datasets e. g. https://openesmdata.org/). Tasks include: literature search, definition of research question and hypotheses, data processing, data visualisation, multilevel modelling and potentially more advanced timeseries modelling in R / JASP. For general framework, see https://doi.org/10.1002/wps.20513	3	1
File Domonkos	Investigating perceived blood sugar fluctuation in relation to craving and addi	Research planning, data colletction and analysis	3	2
Schmelowszky Á.				
Kökönyei Gyöngyi	Rumination	Research planning	1	1
Felvinczi Katalin és Sebestyén Edit	Health Behaviour in School Aged Children HBSC: Health and well-being, Mental health, Body image, Eating habits, Oral health, Family culture, Peer culture, Physical activity, Alcohol use, Tobacco use, Cannabis use, School setting, Sexual health, Social inequality, Migration, Fighting, Bullying, Injuries, Electronic media communication	secondary data analysis; no need for own data collection, using the HBSC open-access international database with more than 50 countries' data. More information: hbsc.org The students choose the topic that best matches their professional interest and formulate specific research questions based on it.	4	1
Aditi Gandotra			6	6
Nagy Tamás				
Horváth Zsolt	Addictive behaviors	Data analysis	3	1
Bertalan Eszter				
Engyel-Székely Márton	Narcissistic states in an experimental setting	Research implementation, data collection, data analysis	3	0
Máté-Kovács Lilla	Emotion regulation and mental health	data analysis	1	0
Király Orsolya	Parental attitudes towards their children's video game play habits	data analysis	1	1
Király Orsolya	Assessing the addictive potential of video games	analyzing video games	3	3
Urbán Róbert	Adverse childhood experience and addictive behaviors	Research planning, data collection, analysis	2	4
Mervó Barbara			2	2
Kenyhercz Viktoria	Change management, work addiction	Research planning	2	
Hodossi Nóra	Menstrual attitudes and symptoms in a biopsychosocial perspective	Research planning, data colletction and analysis	2	1

Urbán Róbert	The Spectrum of ‘Digital Dementia’: Correlations Between Problematic Smartphone Use and Executive Function Decline in Young Adults.	Research planning, data collection and analysis	2	2
Koncz Zsuzsa			2	2
Cserjési Renáta	Rumination and coherence		1	1
